DETAILED ACTION

Claim Objections

1. In re claim 11, line 10, the phrase: "the saidframe" is misspelled and "the" or "said" should be removed; and a semi column should be added;
2. In re claims 12-14, were not reviewed & examined, since they depend on a cancelled claim.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In re claim 11, lines 8-10, although mentioned in col. 6, 2nd paragraph of the Specification, however the elements recited neither shown or specifics provided, especially the positioning means has no support in the disclosure. Therefore, this feature is not treated on its merit.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3671

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pace (5179823), in view of Ogano et al and Zugai, Foster, Campbell.

Pace discloses a mower & edger apparatus (20), the edging unit (75) comprising a guiding member (150), a front caster wheel with adjuster (see fig 14), a handle.

Pace's guiding member is not specified whether it slides or rotatably abuts against guiding surfaces, and neither are details shown regarding the positioning handle or the locking in selective positions thereof.

Ogano discloses that it is known in the art to provide a handle & locking means capable of being pivoted in different planes.

Foster, Zugai, and Campbell disclose that it is known in the art to provide a guide wheel for an edger.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the mower of Pace with the teachings of Ogano, Foster, Zugai, and Campbell, in order to ensure that the edger does not cut too deep into the ground and the handle allows greater maneuverability.

Response to Amendment

7. Amendment to the Abstract & Specification does not conform to the acceptable format required by the Patent Office.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hartz, Kaley et al.
